

## About:

The Carnivora are small porcelain planters that seem to run off with their plants.

The Carnivora are made by hand, using various moulds. For every Carnivora a different set of legs is selected. This is why the position of the one Carnivora differs from that of the other; no two are the same.

The colours are timeless, perfectly matching the exceptional shape of the Carnivora and combine very well with one another. They will give each interior a special touch.

The colours are manually mixed and custom made for the Carnivora. They are obtained by adding pigment to the porcelain, making the planters coloured to the core.

The Carnivora are carefully finished by hand and covered with a transparent, high-gloss glaze. Giving the colour even more depth.
